

CORONAVIRUS DISEASE (COVID-19) SIGNS AND SYMPTOMS

Coronavirus (CoV) is a virus that causes illnesses such as common cold, fever, cough and shortness of breath.

Common symptoms of Infection

Fever

One of the most common symptoms of COVID-19 is fever which will develop within 14 days after contract with the coronavirus.

Dry cough

Dry cough is common for COVID-19 rather than a wet cough. Whenever you find yourself with this symptom call your doctor immediately.

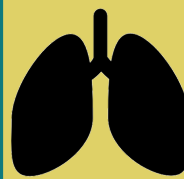

Shortness of breath

People infected with COVID-19 experience trouble breathing, which is another important symptom of the disease.

Severe signs of Infection

Pneumonia

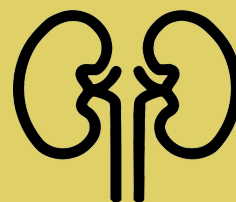

Pneumonia occurs in patients with severe coronavirus disease where one or both the lungs get infected.

Severe Acute Respiratory Syndrome

SARS coronavirus (SARS-CoV) occurs in severe cases where the symptoms are; fever, malaise, myalgia, headache, diarrhoea, and shivering.

Kidney Failure

Kidney failure is another complication that may occur as a result of severe infection.

***Contact your doctor immediately in case you experience any of the above mentioned symptoms**
